

FISCHERJORDAN

About FischerJordan

FischerJordan is a cross-disciplinary consulting firm that helps Fortune 500 clients achieve uncommon clarity, gain control, and win in the marketplace. We have delivered hundreds of millions of dollars of bottom-line impact for our clients. We believe that our work should improve the lives of people and be connected to meaning beyond profit.

Role and responsibilities of a Summer Analyst (Intern)

- Working directly with clients or FJ team members on a day to day basis to identify business needs, frame a solution, seek the data to solve the problem and then present recommendations to drive change
-
- Identifying information sources, understanding database structures and data dictionaries to develop the optimal approach for data extraction, validation, and combination
- Developing predictive models under the supervision of a senior modeler
- Conducting other quantitative and qualitative analyses. This will include reviewing publications and interviewing appropriate industry experts
- Formulating definitive data driven recommendations and presenting them in a client ready presentation
- Data extraction, preparation, validation, and manipulation using statistical analysis tools such as SAS, R, Python or SQL is required

In addition to these responsibilities, we encourage you to contribute in myriad ways limited only by your imagination.

Minimum Qualifications

- Bachelor's degree in Electrical & Electronic Engineering, Mechanical Engineering or Computer Science and graduating in 2021
- **Minimum CGPA: 7.5. We will not accept applications with lower CGPAs**
- Possess excellent analytical skills and attention to detail. Hunger to keep up with the latest trends in advanced analytics
- At least 1 year of experience with SAS, R, or Python
- Hunger to develop skills in building analytical models. This could range from Excel based models to more advanced predictive models
- Strong communication skills enabling you to clearly communicate your thoughts/work to the client or internal teams both verbally and in writing
- High levels of motivation, professionalism, and integrity
- Strong commitment to teamwork
- Ability to handle multiple workstreams and be able to deliver best results under high pressure situations
- Entrepreneurial spirit
